What is txtot?
Effective way to send important text messages.

Everyone today uses mobile phones as a way of communication. But with the busy life and fast pace technology today, people often forgot some special events of their friends, family and loved ones. This is often the cause of mishap between them thinking that they are just taken for granted.

Txtot is a text message sender application that is capable of sending out business requests and other important reminders. Users will never forget to send a message to people who might be anticipating a birthday greeting or appointment from them. It sets a specific time when to send the text message and alerts you when the time arrives to click the send button.
